ENERGY INDEX

Appliance: Saratoga Spa[®]

Model: Broadway XL Spa

Gallons	Temp	KW/Month
795	102°	206

Approximate Monthly Cost: **\$20.64**

Approximate Daily Cost: **\$0.688**

The above daily cost is multiplied by 30 days at 10kwh to approximate operational cost.

- Maintained temperature, not above 102° F
- 24 operation of the Purity Circulation™ Pump
- 15 minutes per day operation of the Jet Pump(s)
- *5 minutes per day operation of Jet Pump 3 on the Lincoln, Empire and Broadway spas
- 15 minutes per day heater operation at 5.5kw
- Cover off the spa 30 minutes per day

The operational cost of hot tubs will include many variables, more than any lab test will reveal. Saratoga Spas[®] understands the hot tub owner will use their hot tub 2-3 times per week during one period, and 4-6 times per week during another period. Ambient temperatures will vary from 50° - 70° across the country, as well as the duration of each use. With this in mind, these are the parameters for determining the approximate operating costs of our Saratoga Spas[®].
