ATTENTION: This email originated outside of Imperial Pools, Inc., The Vinyl Works Inc., or Saratoga Spas Inc. Please exercise caution when clicking links, opening attachments, or responding to this email.

Effective May 1, 2026, driven by volatile raw material costs, Shelter Enterprises will be increasing prices on all Expanded Polystyrene (EPS) including Graphite Infused Polystyrene, (GPS) pricing by 10%. We will honor pricing on all current in house orders shipped on, or prior to May 15th as production allows.

- **The key foam price drivers impacting Material Volatility:** Rapidly increasing feedstock costs for feedstock affect Expandable Polystyrene (EPS) prices.
-
- **Supply Chain Disruptions:** Global chemical shortages, coupled with supply cuts, are forcing manufacturers to raise prices
-
- **Market Pressure:** These increases are impacting all sectors of the building materials, market.
-
- **Fuel Charge:** We also have a \$150 fuel charge per stop on all orders
- These price increases reflect a broader trend of rising costs for building materials across the industry. Please contact us directly if you have and questions, or need help with any specific orders.

Thank you,

Joseph J. Halek
